

*We are*

***Soucooin***

*Technology hand in hand with Social Responsibility*

**We,**

*at SOUCOIN, can connect anyone to the third sector.  
Through technology, we can help those who need it most  
in a fast and innovative way.*

*Our goal is*

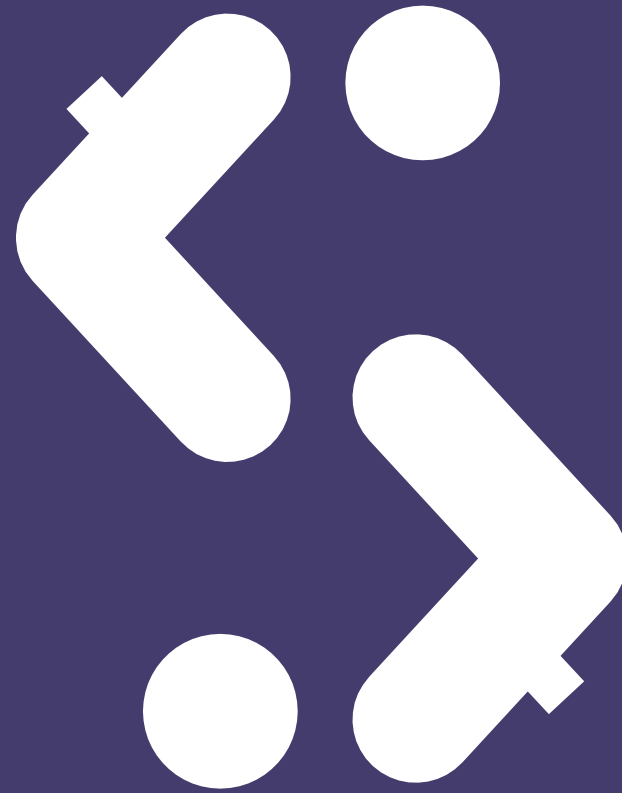

*to turn Soucoin into the world's leading currency for donations*

*and philanthropy in general. We count on you to get there.*

## *How it works*

*With each investment, a percentage will be allocated to a registered NGO or one indicated by the investor.*

## *Our concept*

*We bring a universe of possibilities for those who know that helping others is helping oneself, and for those who know that, together, we are much stronger.*

## *The difficulties of the Sector*

*Lack of transparency*

*Lack of knowledge*

*Bureaucracy*

“

*Today we have many people with goodwill and who want to help others, but the lack of information, as well as difficulty in knowing how to make a donation, discourages these people from practicing compassion towards those who need it most.*

”

*Claudinei Gomes*

## *Our Solutions*

### *The first*

*SOUCCOIN is an innovative currency, focused on the third sector, with the purpose of facilitating the link between the donor and the institution in a transparent and anonymous manner, using blockchain technology, making the tracking of transaction records possible and, also, making these operations much faster and safer.*

### *The only*

*SOUCCOIN is a single currency that will circulate through all the institutions that we will have on our platform, as well as in all the others that want to be part of our ecosystem. With this in just one place, you will be able to choose where to direct your donation, as well as have all the relevant information, and also have an excellent investment option for the future.*

*As a wise person once said:*

*“A civilized society without social inequality has no need of the state.”*

## *Some Specifications*

### *Our name*

*SOUCOIN. However, our acronym on the blockchain network is simply: SOU.*

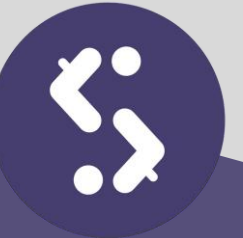

### *Blockchain*

*We will be hosted on the Binance Smart Chain network with 6 decimal places and 2 billion tokens*

### *Smart Contract*

*0x0fbfd825d54e48b02d24  
0f00c5acddd844 b7272e*

# Our Commitment

- 1** *SOUCOIN will offer 500 million tokens in its pre-launch phase.*
- 2** *In the first two years of its launching for purchase and sale on the exchanges, SOUCOIN will bring 500 million more tokens to the market*

# Our Commitment

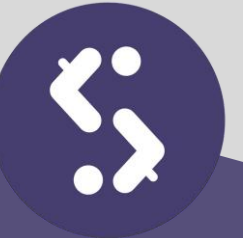

**3** *SOUCOIN commits to the community that in the period of 10 years, 100% of its tokens, that is, 2 billion SOUCOIN, will be on the market, in order for the centralization to be on the market and not in the possession of a private company.*

**4** *The company's goal is to have 10% of the Third Sector in its registration within 10 years (approximately 1 million registered institutions on our platform), making our tokens scarce in the face of a trillionaire market which is the Third Sector.*

# Our Commitment

**5** *Of all sales made by the company, 5% will be allocated as donations to the Third Sector (this amount is not deducted from the customer), where 5% will be made an immediate 2.5% in fiat currency and 2.5% in SOUCOIN currency.*

**6** *SOUCOIN commits to donating 10 million Reais after having sold 50% of its tokens. This donation will be taken to non-profit institutions which have a social project beneficial to people in need.*

*Note: To receive this donation, the institution must be regulated with its documentation and SOUCOIN will be in charge of verifying that it is able to receive the resource.*

# Holding Portfolios Wallets?

SOUCOIN is committed to providing only the maximum amount of 100 million tokens for each individual sale, in order to contain price manipulation within the market.

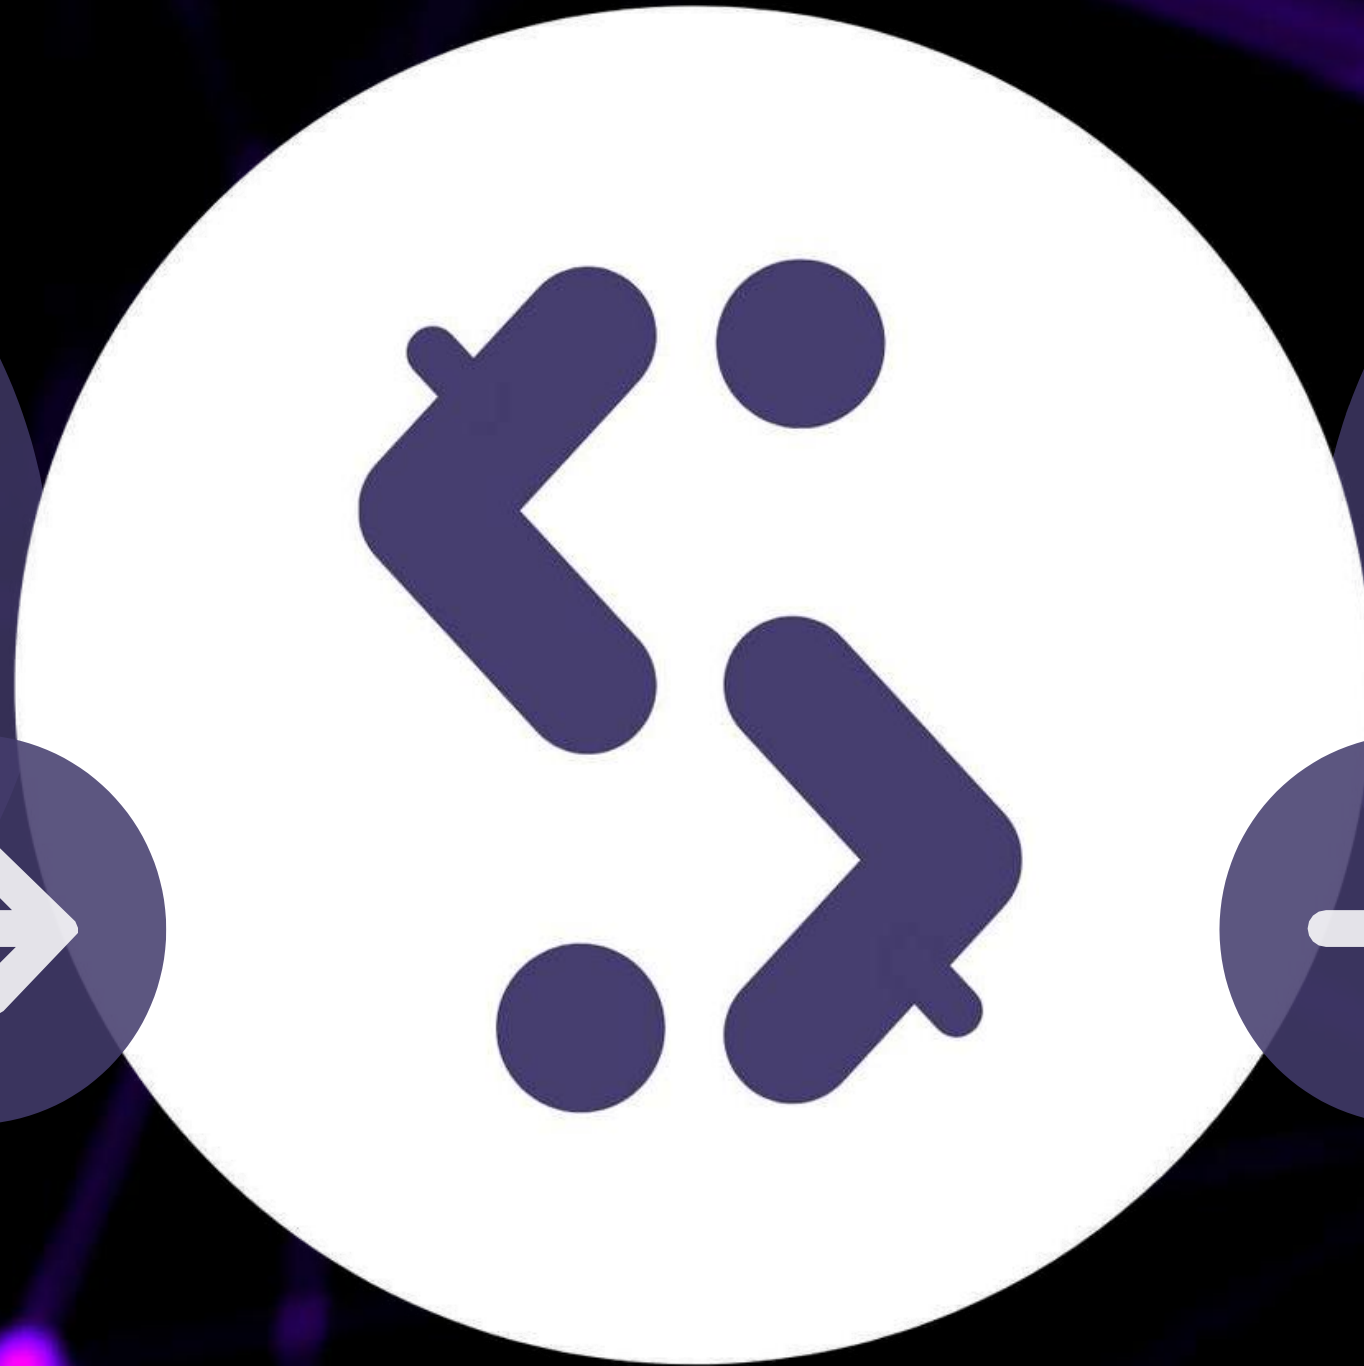

Tokens	%	Release	Wallets
89 million	4%	Wallet in movement	0x2111Bb92237794aA6ED 6F22000032f6710E6d326
400 million	20%	Available for Pre-Sale	0xAe7DAffE5dEb9F6FF8Afc ec2179cfB9059981B71
500 million	25%	Aug 2022 - Jul 2026	0x388634755d77d81A320 150Af60b60340B18B16cE
500 million	25%	Aug 2026 - Jul 2028	0x0eEcc973806335bfA15A A5e7B2AB565f948C1F51
500 million	25%	Aug 2028 - Jul 2031	0xdD46cFE7F4150A6868a 81F0233F8EC6960e9C851

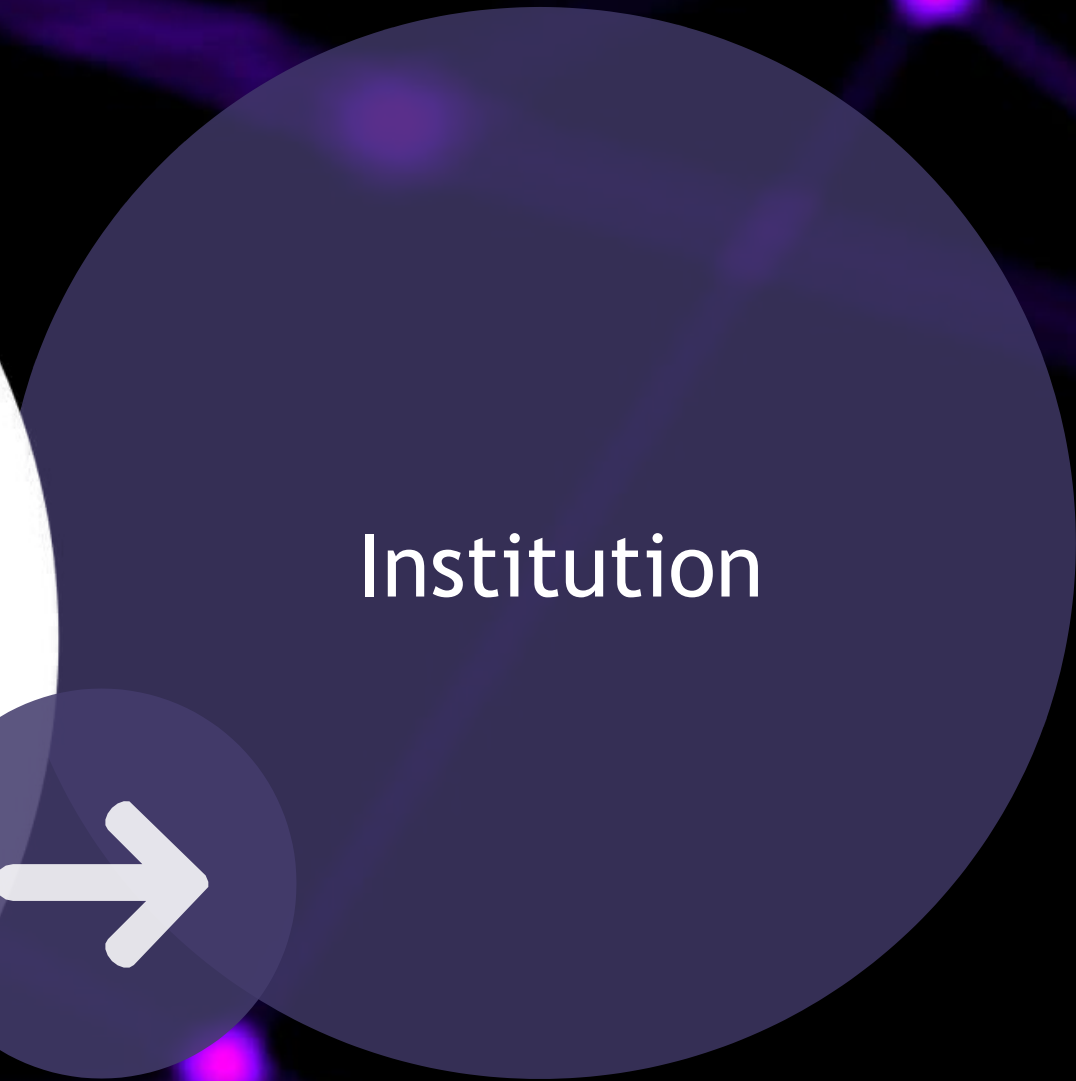

Integration

Investor

Soucoin

Institution

## Understand our cycle

*P2P Sales  
Investors trade with  
each other*

*DIRECT SALES BY SOUCOIN  
5% of each sale is  
donated to the institution  
indicated by the investor*

*SALES THROUGH SOUCOIN.COM.BR  
The investor may appoint an  
institution to be part of the  
our registration*

*SALES BY EXCHANGES*

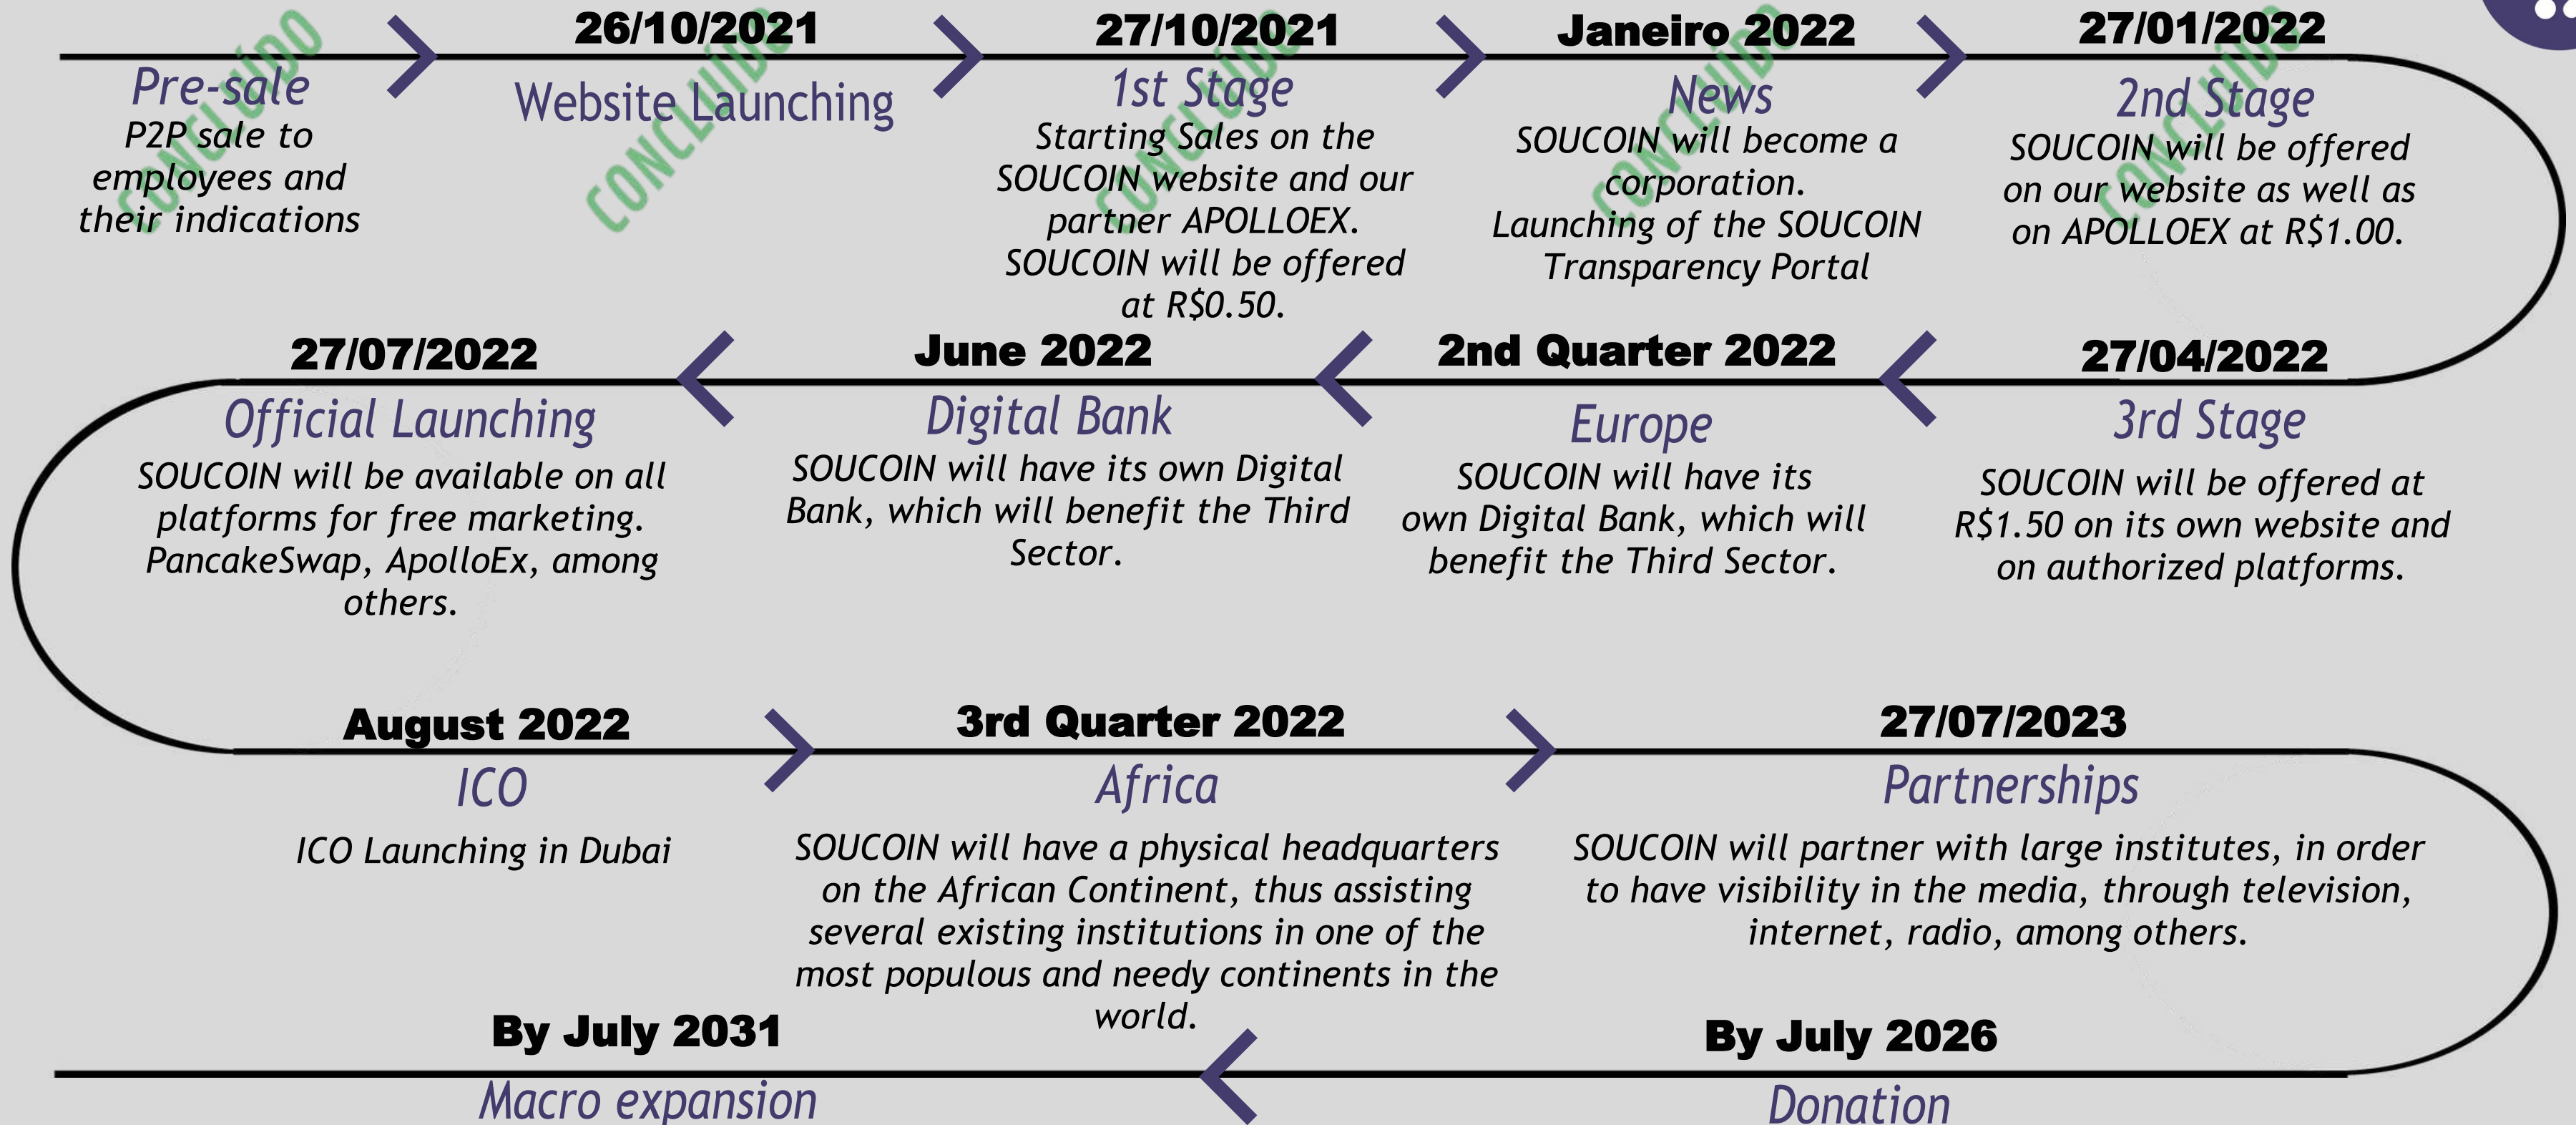

*The investor may acquire  
SOUCOIN on the exchanges  
after the Official Launching*

*THE INVESTOR  
There will be four options to  
acquire SOUCOIN. The asset may  
be kept as an investment, in view  
of an appreciation, or it may  
make a profit in the market with  
its purchase/sale.*

*THE DONOR  
The donor will acquire SOUCOIN  
only for this purpose, observing the  
ease of the link between the donor  
and the institution*

*INSTITUTION/NGO  
The institution, when receiving SOUCOIN  
through donations, will have the option  
to save the asset or make a profit in the  
market with its purchase/sale.*

# Roadmap

# Important Data

780,000,000

*Currently, 780 million people in the world live below the poverty line, with less than 1.90 US Dollars a day to survive...*

R\$ 5,600,000,000

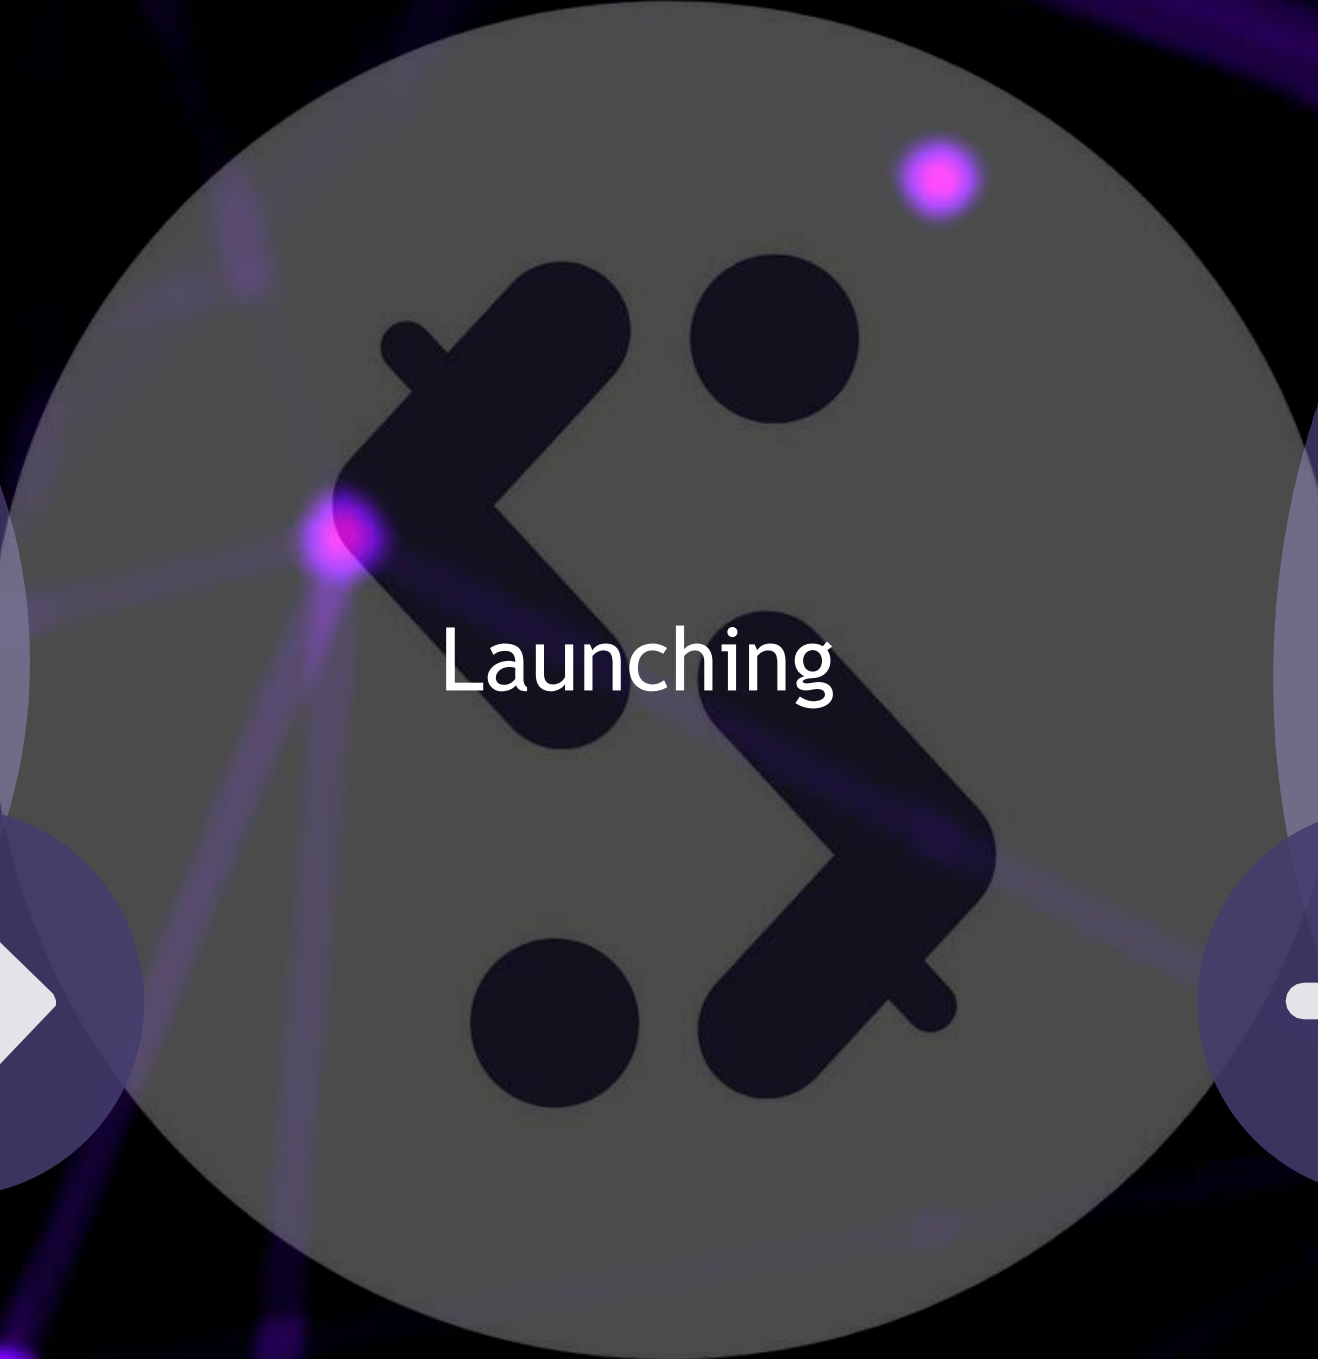

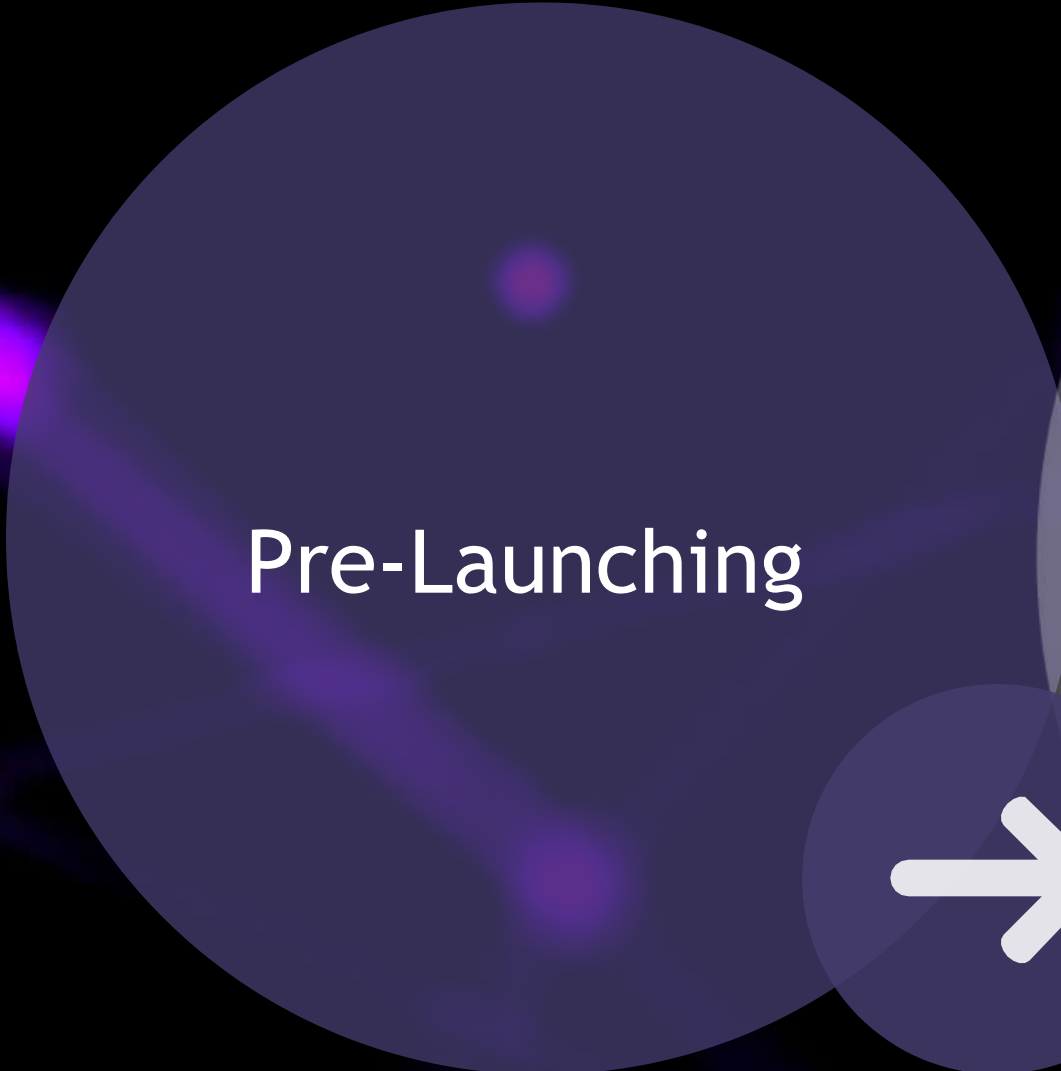

*In 2020, more than 5 billion Reais were donated in Brazil. There are approximately 10 million NGOs in the world, of which more than 800,000 are in Brazil.*

Our proposal

*Create a Blockchain-focused technology portal in which we will allocate approximately 1 million institutions that will have information exposure (data/documents/website), along with a wallet of cryptocurrencies, in which the donor, at their convenience, will have access to all of this information to carry out their donations with total transparency.*

# Our Stages

# *We want to be where we are most needed*

*Our goal is to reach all countries on five continents. We understand that the barrier to donations is knowledge, and we will take this market knowledge to each institution connected to our platform, making the third sector not only known for its numbers of donations but also as the manager of its finances, being able to make profits in such a promising market that is Cryptocurrencies.*

*For this, our team will spare no efforts to give the maximum information, regardless of social, cultural or geographical distance. With this, we will help to combat the world's greatest concern, which is social inequality. We will make tutorials and videos in several languages, from helping to create a wallet to how to buy/sell assets on exchanges.*

# *Transparency Portal.*

# *SouCoin*

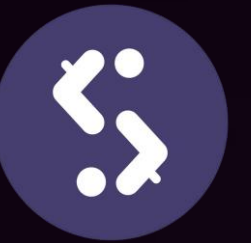

*Today, through Blockchain, any crypto asset transaction can be tracked, but we have no way to identify to whom each wallet belongs.*

*SOUCOIN once again comes out ahead...*

*Being the first company to create a Blockchain-style portal, but more simplified, objective and with total transparency.*

*Each NGO will have its name linked to its wallet and will be able to track the donations received, transactions made and its balance. This will allow public entities, government and donors to track our transactions.*

Transparency Portal: <https://app.soucoin.io/#/ongs>

# Digital Bank

*SOUCOIN will have its own Digital Bank in order to favor the institutions, allowing it to have a credit line without bureaucracy and with a lower interest rate than in any other sector.*

*Part of the profit from the sale of our tokens will be directed to the bank's fund, bringing liquidity, training and autonomy to make this line of credit reach those who need it most.*

*5% of the net income will be directed to the institutions registered on our platform.*

# Where to purchase

*In addition to purchasing directly through the website SOUCOIN.IO you can also find our token with our official partner:*
